

Year 11-12 Calculator Requirements

Your child has chosen to study a Senior Secondary Mathematics course this year.

The Mathematics Learning Area advises that students studying **Mathematical Methods** and/or **Specialist Maths** in years 11-12 are required to have and use a **Casio graphics calculator** in their Mathematics lessons.

Students studying **General or Essential Maths** would benefit from a Casio graphics calculator, however as a bare minimum must have a scientific calculator available for all lessons.

The SACE Board has specifications and conditions for use of Casio graphics and scientific calculators in external examinations. Frequent and appropriate use of graphics calculators throughout the year is recommended to ensure satisfactory use during examinations. The SACE Board recommends the following approved Casio graphics calculators which the Maths teachers at The Heights encourage the use of:

- **Casio fx-CG50AU** – if purchasing from new
- **Casio fx-CG20AU** – if purchasing from second hand

These graphics calculators are available for purchase from the recognised retailers like Officeworks for approximately \$255.00.
